

Occupational Hazards & Vaccination

Department of Medical Education conducted a training/CME on “Occupational Hazards & vaccination” on 17 January 2018 between 2 to 5 pm and 01 February 2018 between 10am to 01 pm in Medical Education Hall.

During the course 100 participants (43 faculty, 45 senior Residents, 11 Junior Residents and 01 PhD candidates had successfully finished training course.

Resource faculty for training programme was from department of Biochemistry, Microbiology & Nuclear Medicine. Coordinator for this programme was Dr. Puneet Kumar Gupta.

The objective of training was told to all the participants at outset of training. Session focused on physical, ergonomic, biological & nuclear hazards faced by medical professionals. It also emphasized on correct ways of donning and removing personal protective gear and vaccination schedules for protection in medical field.

Physical, ergonomic and chemical hazard aspects were discussed by Dr Manisha Naithani, (Additional professor) Department of Biochemistry. She also emphasized on hierarchy of control measures for dealing with occupational hazards. Dr Puneet Kumar Gupta (Assistant Professor) Department of Microbiology deliberated on biological hazards, including needle prick injuries and post exposure prophylaxis and standard precautions. Nuclear hazards were covered by Dr Vandana Kumar Dhingra (Associate Professor) and Ms. Meena Negi (Technical Assistant) enumerating ways to minimize exposure and check exposure limits. At the end of session all the participants were assessed by post- test.
