AIIMS, Rishikesh
Specifications for 12 lead ECG Machine:

1. Should be an electrocardiogram Machine that acquires all the 12 standard leads simultaneously
2. Should have gain settings of 5, 10 and 20 mm/mV.
3. Recording speed should be adjustable (5, 10, 25, 50 mm/sec)
4. Should have various filters such as baseline filter, AC interference filter, and low pass filter
5. Should have a real time colour LCD display of ECG tracings.
6. Should have an alphanumeric keypad and dedicated function keys.
7. Should have an in-built resting ECG interpretation function.
8. Should have an in-built printer that prints on A-4 size thermal paper. The print quality should be good without visible breaks in line.
9. The print configuration should be amenable for change by user such as 3+1, 3+3, 6 and 12 leads.
10. Should have an in-built rechargeable battery that lasts at least 30 mins of continuous recording.
11. Each unit should be supplied with the following accessories:
   a. Two(2) sets of patients cables with 6 chest electrodes and 4 limb electrodes
   b. One (1) compact sturdy metallic trolley with dedicated provision for holding the cables and electrode gel
   c. Thermal paper roll compatible with this ECG Machine for recording 3000 (Three thousands) ECGs.
12. Should be a portable machine weighing not more than 5 Kg
13. Should have been tested and approved by FDA/CE
14. Should conform to all applicable electrical safety standards
15. Should have 3 years on-site comprehensive warranty for all components excluding the accessories and consumables
16. Annual Maintenance contract (AMC) for 5 years (five years; effective from the fourth year of installation) should also be quoted separately.
17. The quoted machine in full configuration should be demonstrated on-site before finalizing the commercial bid.
